AI ENGINEERING ASPIRANT / SOFTWARE DEVELOPER

Motivated Telecommunication Engineering student with a strong focus on Artificial Intelligence and software development. Passionate about building real-world systems, including AI-powered learning tools and management systems. Continuously improving through hands-on projects and practical problem solving.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, HTML, CSS
- **Tools & Technologies:** Flask, Git, Web Development, Databases
- **Areas of Interest:** Artificial Intelligence, Natural Language Processing (NLP), Backend Systems
- **Other Skills:** Problem Solving, Analytical Thinking, System Design (Beginner)

PROJECTS

AI Tutor System (In Progress)
Python, NLP

- Building an AI system that processes lecture slides and generates relevant study questions

Slides to Audio System (In Progress)
Python, Text-to-Speech

- Developing a system that converts lecture slides into audio format for easier learning

School Management System
HTML, CSS, JavaScript

- Built a system to manage student records and academic data

Campus Snarks
Web Technologies

- Developed a platform that allows students to upload and sell products within the campus community

EXPERIENCE

Head of IT Department Accra, Ghana
Islamic Enlightenment Foundation International

- Lead technical operations and manage digital systems
- Support IT-related initiatives and coordinate projects

Senior Programmer – Computer & Robotics Club Sept 2024
Mfantsipim School

- Led programming activities and mentored students
- Built and tested small-scale technical projects

Graphic Designer & Organizer – Mfantsipim School GMSA Sept 2024

- Designed promotional materials and supported event organization

EDUCATION

BSc Telecommunication Engineering Present
Kwame Nkrumah University of Science and Technology

Senior High School (General Science) Sept 2024
Mfantsipim School
